

2

above

```
<interactive>:1:12:  
No instance for (Num Picture)  
  arising from the literal `2' at <interactive>:1:12  
Possible fix: add an instance declaration for (Num Picture)  
In the second argument of `above', namely `2'  
In the expression: above horse 2  
In the definition of `it': it = above horse 2
```
