

:	<code>a -> [a] -> [a]</code>	Add a single element to the front of a list. <code>3:[2,3] [3,2,3]</code>
<code>++</code>	<code>[a] -> [a] -> [a]</code>	Join two lists together. <code>"Ron"++"aldo" "Ronaldo"</code>
<code>!!</code>	<code>[a] -> Int -> a</code>	<code>xs!!n</code> returns the <code>n</code> th element of <code>xs</code> , starting at the beginning and counting from 0. <code>[14,7,3]!!1 7</code>
<code>concat</code>	<code>[[a]] -> [a]</code>	Concatenate a list of lists into a single list. <code>concat [[2,3],[],[4]] [2,3,4]</code>
<code>length</code>	<code>[a] -> Int</code>	The length of the list. <code>length "word" 4</code>
<code>head,last</code>	<code>[a] -> a</code>	The first/last element of the list. <code>head "word" 'w'</code> <code>last "word" 'd'</code>
<code>tail,init</code>	<code>[a] -> [a]</code>	All but the first/last element of the list. <code>tail "word" "ord"</code> <code>init "word" "wor"</code>
<code>replicate</code>	<code>Int -> a -> [a]</code>	Make a list of <code>n</code> copies of the item. <code>replicate3 'c' "ccc"</code>
<code>take</code>	<code>Int -> [a] -> [a]</code>	Take <code>n</code> elements from the front of a list. <code>take 3 "Peccary" "Pec"</code>
<code>drop</code>	<code>Int -> [a] -> [a]</code>	Drop <code>n</code> elements from the front of a list. <code>drop 3 "Peccary" "cary"</code>
<code>splitAt</code>	<code>Int -> [a] -> ([a],[a])</code>	Split a list at a given position. <code>splitAt 3 "Peccary" ("Pec","cary")</code>
<code>reverse</code>	<code>[a] -> [a]</code>	Reverse the order of the elements. <code>reverse [2,1,3] [3,1,2]</code>
<code>zip</code>	<code>[a]->[b]->[(a,b)]</code>	Take a pair of lists into a list of pairs. <code>zip [1,2] [3,4,5] [(1,3),(2,4)]</code>
<code>unzip</code>	<code>[(a,b)] -> ([a],[b])</code>	Take a list of pairs into a pair of lists. <code>unzip [(1,5),(3,6)] ([1,3],[5,6])</code>
